## ASH FIREBRICK

A hand-pitched firebrick is one of our best-selling products. Its unusual, sophisticated color suggests the northern sky at dusk, or a cool swim in dark quarry waters – an elegant alternative to traditional firebrick.

Its edge, visible when installed, has a rustic, hand-crafted finish, ideal for running bond and herringbone firebox patterning. The reflection of firelight on such textured surfaces enhances the beauty of the material, creating an ideal backdrop to compliment any décor. Ash Firebrick will bring warmth, exquisite simplicity, and timeless beauty to any firebox project.

### RECOMMENDED USES

- Fireplaces
- Fire Features
- Firepit Linings
- Veneer
- Pavers
